

## SWIL Presidential Platforms:

### The Chrises

Coming here on behalf of the three Chrises, I should state that unlike the members of the current administration, the three Chrises all have deep experience in specialized fields of academic study and competition, and it would not be fair to have them prove their competence in these fields before!

So \$

First, Chris White

Tossup &: This SWIL president first made herself known to the SWIL community by making out with Gregor (Robinson during a shooting of the Princess) ride and distracting everyone except Arthur Chu, whom she was sitting behind and leaning against. Her trademark weapon is a roll of duct tape and her trademark garment is a black silk bodystocking. With a Josh Smith number of 1 through Lisa Spitale's, thus giving a 10 to Greg (Robinson, ) / an airchild, Michael Onda and Sikandra Christian, for ten points name this 2

3 +ector )erlio 3

Sorry, neg five

Next, Chris Segal, for the

4struggling to state a 5 \* II right, so we're here today to talk about the proposition that 7the current SWIL administration should be replaced8# Well99: !a" n: 99 the \$ the current SWIL administration's incompetence is leading to SWIL's problems much in the way that Napoleon led to the downfall of France, so that the government is proposing today is as the people of France, when Napoleon returns from ; lba !ou should reject him

We're going to cover three major points, the first of which is \$ is Napoleon's moral failings as a leader before! Our still \$ traditional \$ : !a" n: : thud:

=m, !ou still have six minutes and thirty seconds# +mm> \* II right, I guess that's a \$ ??#

Well, Chris Seger was unavailable for comment, but he did write a script enabling him to upload a completed program in Scheme to the CS server, which outputted this: 4sho " several pages of repeated monospace text reading 7@AT; %A( C+( IS , \* ' ; ( 85

So, with Chris White leading the team in negs and Chris Segal losing on substance and points, I guess we should just vote Chris Seger for SWIL president

The Right Club 'u's:

1 on 0 L nonmembers:

I would like to paraphrase an authority on a similar topic, or Thomas Paine:

Small islands not capable of protecting themselves, are the proper objects for kingdoms to take under their care; but there is something very absurd, in supposing a continent to be perpetually governed by an island. In no instance hath nature made the satellite larger than its primary planet, and as Great Britain and America, with respect to each other, reverse the common order of nature, it is evident they belong to different systems: Great Britain to the world, America to itself.

The Polymorphic, Polymorous Job:

We are the Job =nlock our doors and surrender our dorm rooms. You will be assimilated. We will add our biological and technological erotic stimulation to our own. You will adapt to service us. (Resistance is futile.)

Locutus of Job shall speak for us.

We intend to raise the Quality of life for all Students. We not only have multiple semesters of presidential experience, we also have the flexibility of living off-campus and taking a leave of absence from school. We have the engineering expertise to design powerful weapons and big ball processing plants; moreover we have the natural ability to forego sleep for days at a time, focusing on important projects. Not only do we have a diverse and eclectic range of knowledge that has served us on the college football team, we also have a vibrant, fresh perspective on SWIL. We can build connections with the men's rugby team and Cruxis, and use our foam sword fighting prowess to help defend SWIL. Finally, our thick, resilient outer membranes protect us from most projectile and edged weapons, and we have the ability to engulf and digest any organic material, making us not only the potential longest-lived organism in the world, but also eventually capable of devouring the world and turning it into a single gluey gelatinous mass.

## Foreign policy, economy, moral values

We believe that foreign policy, the economy and moral values should be elected to the White House so that they can better protect the basic principles we hold dear of liberty, justice, and the rule of law.

Foreign policy has spent years studying liberty, knowing the delicate balance that keeps liberty from turning against us and destroying us. And by using her experience to build alliances within liberty while being hard and firm on liberty when it's necessary can we be safe in the future?

Furthermore, Obama, though she's been recovering, still looks pretty sick! Sure, maybe Obama has turned the corner, but can we honestly say that Obama is better and more optimistic than a few years ago? Obama's coming through for the rich CEOs, but where are the jobs for the common man that Obama is supposed to provide? We're all supposed to have a place in Obama, as Americans, and to be able to feed our families from her growth and expansion. The economy's first commitment is to Obama, and the economy will do everything it can to stimulate Obama and make Obama work for us.

In all, the rule of law is in a terrible state in America. We may not all agree on what the rule of law is, but we all care about the rule of law, and we know that we don't want a country where our kids are growing up without the rule of law. Moral values know that their strong commitment and faith in the rule of law we can all agree on as a strong foundation for our society is important, and while respecting the different interpretations of the rule of law different faiths and ethnicities may have, we will allow nothing to shake their strong rule of law core.

Vote foreign policy, economy and moral values in 6G-3
